

ILYAS MESLAKIAM

Junior Software Developer

☎ 0639141932

✉ meslakiami@gmail.com

ABOUT ME

Motivated junior developer with a background in digital infrastructure and a current focus on C++ and systems programming at 1337 School. Strong understanding of how software interacts with operating systems, with hands-on experience in building low-level applications. Actively developing problem-solving and software design skills through real-world projects.

EDUCATION

1337 School (UM6P) | 2025 – Present

Software Engineering Program

Diploma: Specialized Technician in Digital Infrastructure (Systems & Networks) | 2022 – 2023

Baccalaureate in Physical Sciences | 2020 – 2021

PROJECTS

Minishell (C Project)

- Built a custom Unix shell inspired by Bash
- Implemented pipes, redirections, and environment variable handling
- Managed process creation using fork/exec and handled signals

NetPractice (Networking Project)

- Solved networking configuration problems involving IP addressing and subnetting
- Developed a strong understanding of TCP/IP fundamentals, routing, and network structure
- Practiced troubleshooting connectivity and network design issues

C++ Modules

- Applying Object-Oriented Programming (OOP): encapsulation, inheritance, polymorphism
 - Writing modular and maintainable C++ code
 - Strengthening memory management and object lifecycle understanding
-

SKILLS

- Programming: C, C++ (in progress)
- Systems: Linux, processes, file descriptors
- Networking: Fundamentals of TCP/IP and infrastructure
- Concepts: OOP, system-level programming
